### Let's Start!

Let's take the cable car down the hill!

## Learning Outcome

Accurately use information about directions to places in a limited range of social situations.

## Can Do Statements

- I can ask and say how far a place is.
- I can describe places in a city.
- I can talk about the weather.

## Ask your partner:

- What is your favorite means of transportation?
- Are you afraid to be in cable cars? Elevators? Why or why not?

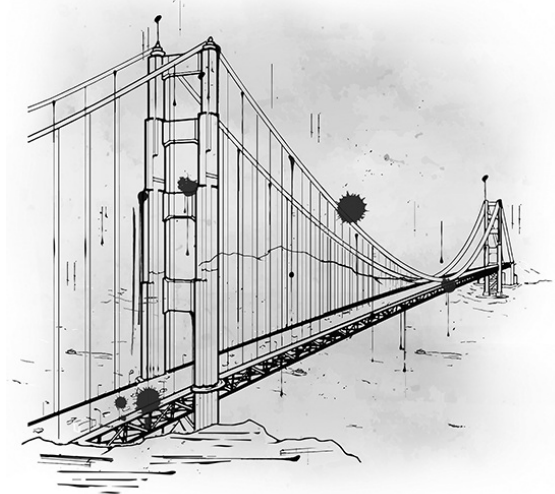

## Let's Explore!

Aunt Nelly knows the city like the **back of her hand**\*! Let's take a walk with her!

\* When you know something "*like the back of your hand*", you know it very well.

*Instructions: Read the text aloud.*

**Aunt Nelly:** You are lucky! The weather is perfect today: sunny and cool.  
**British Tourist:** It is a bit windy by the water. Does it get chilly on the ferry?  
**Aunt Nelly:** A little. It's a short ride, only 1.5 miles.  
**British Tourist:** What else can I do in San Francisco?  
**Aunt Nelly:** You must see the Golden Gate Bridge! It glows like gold in the sun.  
**British Tourist:** How far is it?  
**Aunt Nelly:** It's 7 miles away. The cable car goes there.  
**British Tourist:** Where is the cable car stop?  
**Aunt Nelly:** It's just around the corner, by the pier. It's 50 yards away.  
**British Tourist:** Thank you so much!  
**Aunt Nelly:** You're welcome. Enjoy the Alcatraz Tour!  
**Vanessa:** You know the city really well!  
**Aunt Nelly:** I do. It's my favorite place in the world. It rains a lot, but I don't care!  
 I'm British!

## Let's Practice!

You can do many things in San Francisco! Would you like some recommendations?

*Instructions: Draw a line from the first part of the statement on the left to the second part on the right.*

## Learning Points

### Saying How Far a Place Is

When you want to know how far a place is, you can use the question: *How far is ... ?*  
When talking about distance, you use the **Simple Present Tense**.  
You can reply with a specific distance if you know the answer, like *It's 50 yards away*.

In the USA, you use the imperial system, not the metric system.

If a place is nearby, you use yards to say how far it is.

If a place is far, you use miles to say how far it is.

| Imperial System | Metric System   |
|-----------------|-----------------|
| 1 mile          | 1.6 kilometers  |
| 1 yard          | 91 centimeters  |
| 1 foot          | 30 centimeters  |
| 1 inch          | 2.5 centimeters |

### Examples:

• **Tourist:** *Excuse me, how far is the Golden Gate Bridge?*

**Ann:** *It's 7 miles away.*

## Learning Points

### Talking About the Weather

When you want to know about the weather, you can ask a question using **what**, like *What's the weather like?*

You use the following words and phrases to talk about the weather.

| It's ...                                                                            |                                                                                     |
|-------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------|
| hot                                                                                 | warm                                                                                |
|    |    |
| cool                                                                                | cold                                                                                |
|  |  |
| raining                                                                             | sunny                                                                               |
|  |  |

### Examples:

- **Ann:** *The weather is perfect today.*
- **Bob:** *Yes, it's sunny and cool.*
